- 1. In early May 1952, a number of the individual plants of SAG Kabel were handed back to German ownership. SAG Kabel headquarters, however, still remains at its old address (Berlin-Lichtenberg 0 112, Neue Bahnhofstrasse 9-11) controlling the remaining firms in SAG Kabel. In July 1952, some uncertainty prevailed among the staff of SAG Kabel as to the future of the headquarter organizations. Pusyrov fnu, personnel chief, flew to Moscow in June 1952 to obtain exact instructions. He returned on 17 July, although he had expected to be back on 1 July. The staff understood that no major changes in the plant or in its methods were to be expected before the appearance of the half-yearly report covering the first six months of 1952.
- 2. Staff changes. A.I. Shabanes returned to Moscow in the opening days of July. His post as head of the scientific technical section has been taken by Dyakonov fnu, assisted by Shketnikov Inu.
- 3. Scientific technical offices (NTBs)1

SAG Kabel controlled four such offices in July 1952. The numerical system by which they were formerly known has been officially abandoned and they now have the following nerses:

(a) NTB for heavy and light electric motors

(Wissenschaftliches Technisches Buero (WTB) fuer schwere und leichte Elektromotoren, formerly NTB-1). Russian head G.R. Shulyakova

Address

Berlin-Oberschoeneweide, Wilhelminenhofstrass 83-85.
